Summary

Throughout my journey as a web developer, I've faced numerous challenges and experienced countless learning opportunities. These experiences have shaped me into a seasoned software engineer, with a deep understanding of web development and a passion for exploring new technologies.

As I've honed my problem-solving skills, I've also become adept at connecting with my teammates and working collaboratively to achieve project goals. I'm constantly striving to improve both my soft and hard skills, knowing that becoming a better team member and software engineer is an ongoing process.

Looking back on my career, I'm proud of the work I've accomplished and excited for the opportunities that lie ahead. I'm eager to continue my journey and help drive the development of innovative web applications that solve real-world problems.

Experience

Full Stack Software Engineer

Quant

Mar 2023 - Present (6 months)

In my position at Quant Network LTD, I have been responsible for building interactive web apps for the company's core product called Overledger. Using Java/Spring Boot, JavaScript frameworks like Vue.js and Node.js, microservices, PHP framework Laravel, and other cutting-edge technologies, I've played a crucial role in helping blockchain developers and enterprise companies interact with the Overledger APIs. At Quant, we are unlocking the power of blockchain for everyone by delivering interoperable ecosystems and real-world solutions that simply work: lowering costs, enabling new business, and mitigating risk.

Software Developer

Quant

Sep 2021 - Mar 2023 (1 year 7 months)

PHP Developer

Asre Danesh Afzar

Jan 2021 - Aug 2021 (8 months)

I joined Asre Danesh Afzar as a PHP Developer, where I worked on a variety of web-based projects for eight months. Asre Danesh Afzar specialized in IT training, e-banking, App development, and IT services. I utilized my skills in PHP, Laravel framework, MySQL, and Redis to deliver high-quality web applications.

Back End Developer

Nobaar | نوبار

Jul 2019 - Nov 2020 (1 year 5 months)

I joined Nobaar in the early days of it, a startup that focused on transforming the logistics industry. As a Back End Developer, I was responsible for designing and implementing APIs and application logic. I

also had the opportunity to work on server-side tools like Linux and Docker. One of the most rewarding aspects of my time at Nobaar was helping the company grow and building the engineering team. I was passionate about the startup's mission and was determined to contribute my technical expertise to its success.

Freelance Web Developer
iQStudio
Mar 2016 - Jan 2020 (3 years 11 months)
I started at iQStudio, a freelance web development team that worked on numerous national projects. My team and I helped clients across various industries, from travel to education, to design and implement cutting-edge web applications using the latest technologies.
